

Aztec

Transferring pattern using light box method:  

- 1- Tape pattern to window. The sunnier it is outside, the better.
- 2- Center and hold and or tape cloth over pattern.
- 3- Trace pattern onto cloth using and pencil or felt permanent marker. I recommend black.

4- Start with the main outline of your design then move forward into the smaller detail.

* Keep in mind that the loop side of your project will be the reverse of what you've traced.

*Follow your favorite punch needling tutorials and start punching!
